

# Radsafe CLG - Overview

**Radsafe CLG** is a not-for-profit, limited liability SME company owned and managed by its Members - major consignors of radioactive material.

Radsafe maintains a 24/7 emergency response for incidents involving Members' radioactive material packages on the road and rail networks of Great Britain.

The response is triggered via a single call centre notification, and once received, Radsafe's response is initiated - a team is despatched to the scene by the Member located closest to that incident.

**Radsafe Members collaborate fully in pursuit of the nuclear industry's paramount objective - safety. Members share knowledge and best practice.**

## **Radsafe CLG** - Statement of Strategic Intent

To be a mutual-aid association whose Members collaborate, sharing knowledge and experience, to define and manage initial emergency response procedures for incidents occurring in Great Britain during transportation of Members' radiological materials.

### **Radsafe** facilitates:

- Sharing and development of knowledge amongst its Members to enhance the initial response to transport incidents
- Coordination of member-led initial responses to radiological transport incidents involving Members' materials
- Provision of advice from Members to Emergency Services

### **Radsafe** provides:

- Training and advice to Members and their responders on initial response requirements for transport incidents
- Awareness Training to emergency services on Members initial response to transport incidents
- Guidelines and protocols for incident response for its Members

### **Radsafe** informs:

- Policy Makers, Regulators and Stakeholders (e.g. Emergency Services) by channelling the collective knowledge and experience of its Members.
